Tulungagung, Indonesia | wa.me/6285851150539

Enggar is a dedicated Fullstack Web Developer with over 2 years of experience developing and maintaining web applications. Proficient in front-end (HTML, CSS, JavaScript) and back-end (Laravel, CodeIgniter, MySQL) technologies, with expertise in RESTful API design and database management. Known for strong problem-solving, adaptability, and a collaborative mindset, consistently delivering scalable, user-focused solutions with a commitment to quality and innovation. Passionate about delivering innovative web solutions and solving complex challenges, while growing into a technical specialist role.

Work Experience

Full Stack Web Programmer (Freelance)

Jun 2024 - Aug 2024

PT Smart IT Mantap Digital Indonesia | Surabaya, Indonesia

- Executed a project to integrate client revisions or feedback into the existing ERP system.
- Achieved improved system efficiency, with the project now utilized by 70+ users for daily operations within the organization which processed up to 82 data orders daily.
- Implemented a streamlined deployment process by managing code changes from Git to the live server using PuTTY, ensuring smooth operation of the production server.

Full Stack Web Developer (Full Time)

Mar 2023 - Jun 2024

PT Smart IT Mantap Digital Indonesia | Surabaya, Indonesia

- Designed website prototype and developed the core codebase while analyzing database requirements for a logistics-focused ERP project consisting of four modules (workshop, warehouse, operational admin, and operational driver), from scratch.
- Developed and integrated APIs while creating comprehensive API documentation for internal and external developers.
- Coordinated the end-user training on operating the system, ensuring the workflow aligned with user requirements.

Web Developer (Internship)

Sep 2021 - Jun 2022

PT Piramida Teknologi Informasi | Surabaya, Indonesia

- Translated mockup designs into a fully functional website interface, achieving 100% design accuracy as verified and approved by analysts.
- Initiated the design and implementation of a database for the E-Office project to manage office activities for 40 employees, resolving issues and improving the database.
- Collaborated with senior programmers in making additional features related to the procurement of goods and services for about 6000 procurement packages data.

Backend Developer (Internship)

Jun 2021 - Aug 2021

PT Madani Jayantara Indonesia | Malang, Indonesia • Analyzed the flow of the survey

manager website application with the developer team.

- Initiated the RESTful APIs using the Laravel framework for the Survey Manager web application, while designing and enhancing the database.
- Created comprehensive API documentation for internal front-end developer.

Education

Dibimbing.id

Nov 2024 - May 2025

Bootcamp in Frontend Web Development

Related Coursework: Javascript, React, OOP, Typescript, HTML, CSS, Tailwind CSS, Git.

- Completed comprehensive training in Javascript, Typescript, and Tailwind CSS covering its fundamentals, advanced concepts, and practical application.
- Achieved **Top 2 student** ranked during the November-February period with an average score of **93/100**.

State Polytechnic of Malang

Sep 2018 - Aug 2024

Bachelor of Applied Computer - Informatics Engineering

GPA 3.62/4.00 (134 credits)

- Led a team of 5 in the '**Project 2**' subject over one semester to develop a web-based online bookstore from initial concept to final documentation.
- Completed a 2-month mandatory **internship** as a Backend Developer at PT Madani Jayantara Indonesia. Followed by a 3-month Kampus Merdeka Internship and a 6-month extension as a Web Developer at PT Piramida Teknologi Informasi. Achieving an 'A' grade at both companies.
- Developed a system using the Laravel framework to implement the Naïve Bayes algorithm for classifying tender status on procurement packages, as part of my **thesis** project.

Vocational High School Telkom Malang

Jul 2015 - May 2018

Computer Software Engineering

Project

Lookmandjaja Logistic

Mar 2023 - Aug 2024

An internal ERP system for a logistics company featuring four key modules: operational, workshop, warehouse, and a driver app. The system is designed to manage and track deliveries, monitor vehicle repair statuses, and oversee spare part inventory. My contributions included database design (MySQL), prototyping (HTML, CSS, Bootstrap, and JQuery), code development (Laravel 10), and API integration (RESTful API).

Organizational Experience

Public Relation Divisions

Sep 2018 - Dec 2018

Seni Theatrisic Student Organizations of Polinema

- Draft, edit, and disseminate press releases and announcements.
- Ensure smooth and effective communication within the organization including creating event organization permits for internal parties.
